

大学院特別講義のご案内

- Date and time: 5:30-7:00 pm, July 8, 2013.
- **Speaker: Clark M. Stanford DDS, Ph.D.**
- Associate Dean for Research and, Centennial Fund Professor for Clinical Research, The University of Iowa, USA.
- Place: Yumikura memorial hall
- **Title: “Management of the Ectodermal Dysplasia Patient”**
- Abstract:

Patients often present with congenital and acquired tooth loss and it is incumbent on the Prosthodontics team to diagnosis, educate and provide care plans that address the range of issues concerning the young adult needing tooth replacement therapy. The diagnostic phase is critical and involves an interdisciplinary team. This will lead to progressive care plans that engages removable, fixed and implant Prosthodontics. This presentation will review the critical points of assessment, key points to outline in the process of informed consent and then provide clinical examples of care planes for the transitional adult in your practice.
- Objectives:

The participant will understand at the conclusion of this presentation:

 - ✓ The diagnostic issues needed in addressing the issues of tooth loss in the young adult,
 - ✓ The range of treatment options for tooth replacement including advantages and challenges,
 - ✓ The outcomes of care when electing to perform tooth replacement in this population
- Contact person: Kazunori Ikebe (Department of Prosthodontics, Gerodontology and Oral Rehabilitation, Ext. 2954)
