System for Publishing Career Decisions “Career Support System”

All graduating students,

Please submit the 'Career Decision Notification' form through your My Page as soon as your career path or job offer is determined, regardless of whether it is for higher education, employment, or other (undecided, etc.).

※Please check the "Expected Graduation Date" on your My Page and make any necessary changes if required.

If you are unable to access the reporting screen, please contact the Career Center.

This information is necessary for the university to know the status of employment offers, etc., and to use it to provide career and employment support to younger students studying at the university, as well as to provide the necessary data to respond to the statistical survey conducted annually by the Ministry of Education, Culture, Sports, Science and Technology, so all students must report. Names and other personal information will not be made public. We ask for your cooperation in understanding the purpose before the end of March.
